Hiring Committee
Advancy
New York, NY

Dear Hiring Committee,

I am writing to apply for the Junior Strategy Consultant position at Advancy for a January 2026 start. I am currently a PhD candidate in Economics at Johns Hopkins University. My training combines rigorous quantitative analysis, structured problem solving, and clear communication. I am motivated by problems that require careful framing, disciplined analysis, and actionable conclusions under time constraints. Advancy's project driven, meritocratic consulting environment aligns closely with how I approach analytical work.

My research agenda is at the intersection of wealth inequality and macroeconomics. In my job market paper, I build and estimate a structural heterogeneous agent model with returns that differ across households. The core contribution is to show how heterogeneity in returns and income risk jointly shape the wealth distribution and consumption behavior. Relative to closely related work, my framework performs better at matching the lower and middle portions of the wealth distribution. This difference matters quantitatively. Models that focus primarily on returns heterogeneity can fit the top of the wealth distribution closely but tend to generate too much wealth among the bottom half of households. In my framework, income uncertainty generates a precautionary saving motive that produces genuinely low wealth households. This leads to a realistic distribution of marginal propensities to consume and aggregate consumption responses that align with empirical estimates.

A key feature of my research is the use of both quantitative and qualitative analysis to answer applied questions. I identify objectives, collect and structure data from multiple sources, and design analyses to support clear recommendations. I regularly translate complex analysis into concise written deliverables and presentations. This work requires adaptability, attention to detail, and the ability to work effectively in team settings, skills that map directly to strategy consulting engagements.

I am particularly interested in Advancy because of its emphasis on early responsibility and direct exposure to senior decision makers. The opportunity to contribute meaningfully to client projects from the outset and to work across industries in a global consulting environment is especially appealing. I value environments that reward curiosity, professionalism, and strong analytical thinking.

My economics training has provided a strong foundation in quantitative reasoning, data analysis, and structured problem solving. I am comfortable working with large datasets, conducting rigorous analysis, and communicating insights clearly to non technical audiences. I work well in collaborative teams and value feedback as part of continuous improvement. These skills are central to my research process and would be directly applicable as a Junior Consultant at Advancy.

I am also enthusiastic about the prospect of living and working in New York City and committing

fully to an in person consulting role. I see this position as an opportunity to apply my analytical training in a fast paced environment while building a long term career in strategy consulting.

I would welcome the opportunity to contribute my skills and perspective to Advancy. Thank you for your time and consideration.

Sincerely,

Decory Edwards
