Hiring Committee
Mfinite Consulting LLC

Dear Hiring Committee,

I am writing to apply for the Research Analyst position with Mfinite Consulting. I am currently a Ph.D. candidate in Economics at Johns Hopkins University and expect to complete my degree in May 2026. My research and professional training focus on quantitative analysis, economic policy evaluation, and data-driven decision making, and I would welcome the opportunity to contribute these skills to Mfinite's work supporting public sector programs and initiatives.

My academic work combines economic theory with empirical research using large datasets to evaluate economic outcomes and policy impacts. In my job market paper, I develop a quantitative model to study the dynamics of wealth accumulation and inequality using household-level data from the Survey of Consumer Finances. This project required extensive data construction, statistical analysis, and computational modeling using tools such as Python and Stata. Through this work I have gained substantial experience collecting, cleaning, and analyzing data, extracting insights from complex datasets, and communicating research findings in clear and accessible ways.

In addition to technical analysis, I place strong emphasis on translating data into actionable insights for decision makers. I regularly prepare research summaries, visualizations, and written reports designed to communicate complex findings to both technical and non-technical audiences. I would be excited to apply these skills to support program evaluation, policy analysis, and the development of performance metrics for public sector initiatives.

Mfinite Consulting's mission of strengthening organizations through improved operations and data-driven insights strongly resonates with my interests. I value collaborative research environments and would welcome the opportunity to work with program managers, leadership teams, and external stakeholders to design research frameworks, evaluate program effectiveness, and support evidence-based decision making.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my research and analytical skills could contribute to Mfinite Consulting's work supporting government and organizational partners.

Sincerely,

Decory Edwards
