Department of Economics
University of New Mexico
Albuquerque, NM 87131
USA

Dear Members of the Search Committee,

I am writing to express my interest in the tenure-track Assistant Professor position in the Department of Economics at the University of New Mexico, beginning Fall 2026. I am a Ph.D. candidate in Economics at Johns Hopkins University, advised by Professors Christopher D. Carroll, Nicholas W. Papageorge, and Stelios Fourakis, and I expect to receive my degree in May 2026. My research fields are macroeconomics, wealth and income dynamics, and computational economics.

My research agenda focuses on understanding the determinants of wealth inequality and the mechanisms through which heterogeneity in returns to wealth shapes aggregate outcomes. In my job-market paper, I estimate the degree of heterogeneity in individual portfolio returns using micro-data from the Survey of Consumer Finances and simulate a structural model in which households face idiosyncratic return risk. I show that allowing for persistent heterogeneity in returns substantially improves the model's ability to match the empirical distribution of wealth, offering a tractable way to connect micro-level return dispersion to macroeconomic inequality.

In a second project, I use the Health and Retirement Study to examine the relationship between interpersonal trust and portfolio performance. Building on the literature that finds a hump-shaped relationship between trust and income, I show that a similar relationship holds for individual returns to wealth measured in the HRS data, highlighting a behavioral channel through which social attitudes shape saving and investment outcomes. This work also provides new estimates of the persistent component of returns to net worth, which motivate the calibration of heterogeneity in my structural model.

The University of New Mexico's Department of Economics has a strong tradition of applied and empirical research, particularly in macroeconomics, development, and public policy. My work contributes to these areas by combining micro-data and computational tools to explore how individual heterogeneity translates into aggregate outcomes and long-term inequality. I am drawn to UNM's research environment, which values both policy relevance and methodological rigor, and to the opportunity to collaborate with faculty and students on topics that link economic behavior, inequality, and growth.

Teaching. My teaching experience centers on undergraduate macroeconomics and an upper-level macro-policy seminar, where I have led weekly discussion sections and held regular office hours for classes ranging from 16 to 40 students. My approach is student-centered: I aim to help students "convince themselves" that they have moved from confusion to understanding by holding structured

office-hour coaching that builds trust and confidence. At UNM, I am prepared to teach *Principles of Macroeconomics*, *Intermediate Macroeconomic Theory*, *Money and Banking*, and *Quantitative Methods for Economics*. I would also welcome developing electives such as *Economics of Inequality and Tax Policy* or *Computational Macroeconomics and Policy*, emphasizing reproducible workflows and evidence-based decision-making.

I believe I would be a strong fit because my computational and empirical toolkit allows me to (i) produce robust, data-backed estimates of returns and distributional outcomes, (ii) build and validate models that speak to macroeconomic and policy-relevant questions, and (iii) collaborate effectively with faculty and mentor students in a diverse and research-active department. I am enthusiastic about the opportunity to contribute to the University of New Mexico's research, teaching, and service missions.

I would be honored to join the University of New Mexico's Department of Economics and to contribute to its teaching and research programs. Thank you for your consideration; I welcome the opportunity to discuss my fit with your department at your convenience.

Sincerely,

Decory Edwards
