May 10, 2026

Dear Members of the Search Committee,

I am writing to apply for the position advertised through your careers portal. I am a Ph.D. candidate in Economics at Johns Hopkins University with a strong background in econometrics, quantitative modeling, and applied economic analysis, and I am excited about the opportunity to apply these skills in a consulting and analytical environment.

My research combines structural modeling with empirical analysis using large-scale micro and panel datasets. My job market paper develops a heterogeneous-agent model to study wealth inequality and the distributional consequences of economic shocks. In related work using the Health and Retirement Study, I analyze individual-level panel data to study financial behavior and trust, applying econometric techniques and causal identification strategies to understand how households respond to uncertainty and changing economic conditions. These projects have required extensive experience in data construction, statistical analysis, model development, and translating complex quantitative findings into clear and actionable insights.

I have extensive experience working with large datasets and statistical software including Python and Stata, and I am comfortable developing reproducible analytical workflows, conducting regression analysis, and building quantitative frameworks to support decision-making. My work frequently involves synthesizing complex information into concise conclusions for broader audiences, and my teaching experience has further strengthened my ability to communicate technical concepts clearly and effectively.

I am particularly drawn to opportunities that combine rigorous quantitative analysis with practical problem-solving and collaboration. I enjoy working in fast-paced, team-oriented environments where analytical tools can be used to address real-world business and policy questions. I would be excited to contribute my technical background, research experience, and strong quantitative training to your organization.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my background and experience could contribute to your team.

Sincerely,

Decory Edwards
